

**PU : PISTON SEAL FOR HYDRAULIC APPLICATION****Features :**

Piston Seal profile is a single acting U cup type seal which have very good static and dynamic tightness. The seal can be used for double acting applications by fitting back to back in separate grooves. The outer dynamic lip is more robust to provide improved sealing and compression set characteristics.

**Material :** Polyurethane, Hardness 93° Shore A

**Properties :**

High resistance to abrasion, Easy installation.

**Application :**

Mobile Hydraulics, Injection molding machines, Machine tools, Agricultural equipment, Standard cylinders.

**General Technical Data :**

Temperature range: -30 to 110°C

Working Pressure Up to 320 bar

Surface Speed 0.5 m/s.

Maximum working pressure can be extended up to 400 bar with the use of a back up ring.

**Surface finish :**

Roughness depth R ma x R a

Sliding surface = ≤ 2,5 µm

Bottom of groove = ≤ 6,3 µm

Sides of groove = ≤ 15 µm

**Gap dimension :**

The largest gap dimension appearing in operation on the non-pressurized side of the seal is decisive for sealing function. Figures show the maximum permissible gap all on one side using the minimum clearance Ø and ma x bore Ø.

Seal Profile Maximum permissible gap (S)
